GCLMPO hosted an Agency Pre-Scoping Meeting on April 7, 2021. The following individuals were invited to the virtual meeting:

Name (Attended Y/N)	Title	Agency	Comment(s)
Loretta Barren (Y)	Divisions 10-12 Air Quality, Planning & Environment Specialist	FHWA	None received
Chrystal Amschler (N)	NCDOT Div. 14 Project Manager	USACE	<p><b>Meeting (4/7/21):</b> (1) What is the purpose and plan associated with the dotted line as if the eastern end of the Catawba Crossings study corridor would continue east of NC 160. (2) The proposed Catawba Crossings interchange with I-485 could be moved further north to avoid impacts to streams and a park. (3) What is the design year for the project? Is there a drive for economic development from this project? (4) If the Catawba Crossings does make the prioritization and becomes a NCDOT project will the remaining Garden Parkway be dropped, or will it continue to be included in area transportation plans?</p> <p><b>Email (4/8/21) [SAW-2021-00741]:</b> USFWS’s listings of federally endangered or threatened species include Northern long-eared bat; Dwarf-flowered heartleaf; Schweinitz's sunflower; Carolina heelsplitter; Rusty-patched bumble bee; Michaux's sumac; and Smooth coneflower. The Georgia aster is listed as a Candidate species and Carolina Hemlock is listed as an At-Risk Species. There have also been recent sightings of Bald Eagle on Lake Wylie.</p> <p>Potential impacts to streams, the NCDMS mitigation site, and Berewick Park could be minimized if the corridor on the east side of the Catawba River and south of the Charlotte Open Space continues due east to cross Dixie River Road and Beaverdam Creek and then parallels the north side of Garrison Road to connect directly to the existing I-485 interchange at West Boulevard. We understand that there are developments proposed in the short-term that would affect this alignment, and that the I-485 interchange on the south side of the airport may be revised independent of this project. Also, as discussed, traffic data will be developed during the Feasibility Study to support the need and to further define the purpose to allow identification of feasible alternatives during project development.</p> <p>We also have a few questions that should be addressed in the study: (1) Is there likely to be FHWA funding for this project; and (2) How was the western terminus of the corridor determined?</p>
Eric Alsmeyer (Y)	NCDOT Div. 10/12 Project Manager		
Monte Matthews (Y)	NCDOT Coordinator		

Holland Youngman (Y)	NCDOT Div. 9-14 Project Manager	USFWS	<b>Email (4/12/21):</b> The proposed alignment appears to cross portions of Lake Wylie/ Catawba River in proximity to known waterbird colonies and a bald eagle nesting location.
Marla Chamber (N)	NCDOT Div. 9-14 Project Manager	NC Wildlife Commission	None received
Amanetta Somerville (Y)	Region 4-NEPA Program Manager	USEPA	<b>Meeting (4/7/21):</b> (1) Are there any other aspects of the Garden Parkway being developed or redeveloped at this time? (2) What is the timeline for the River District Project? (3) Is there any quantitative data to show a need for commuter time improvement?
Hall Pitts (N)	Commander	USCG	None received
